

Legend

- — Ball = provided interface (service offered)
- (Socket = required interface (service needed)
- Ball + socket joined = assembly connector
- Yellow = services · Green = data · Red = external

Key data flows (from Lab 1 use cases)

- Founder → UI → Campaign Manager: create campaign, milestones, tiers (UC-01/02)
- Backer → UI → Campaign Manager → Payment Service: tier + payment token → Gateway holds funds in escrow (UC-03/04/05)
- Founder submits evidence → Milestone Verification (UC-07)
- Faculty approves → audit log written → releaseTranche() → Payment Service → Gateway releases escrow (UC-09/10)
- Reject: status Pending Resubmission; deadline expiry → refund via Payment Service
- Notification sent at every status change (FR-005)
